Probe Master's 9117 Test Lead Combo Kit

This new kit brings our 9100 series and 8000 series together in one kit. The 8056 Banana Tip Adapter allows all the 9100 series accessories to fit on the 8000 series test leads. And, with all the hook tips, insulated probe tips and many alligator clips to choose from, you have endless combinations to meet any application. The kit includes a black storage case with custom foam insert & removable zippered pouch for easy storage of all accessories and leads. The removable pouch can also be used to hold your meter or other small instruments.
